SUMMARY

Computer Science and Information Technology undergraduate and Python Developer with hands-on experience building and deploying production software, REST APIs, backend systems, automation workflows, and AI applications. Experienced in Python, Django, Flask, FastAPI, Kotlin, PostgreSQL, AWS, Docker, Linux, CI/CD, API integration, testing, troubleshooting, and system modernization. Built a real-time police command platform supporting 14,900+ idols across 72 police stations and infrastructure designed for 3,000–4,000 concurrent users.

EXPERIENCE

Technical Engineer Intern | Telangana Police IT Cell

Hyderabad | 2026 – Present

- Built a production-grade real-time police command platform managing 14,900+ idols across 72 police stations with jurisdiction-aware role-based access control and automated officer assignment.
- Developed live GPS tracking and journey visualization using Kotlin, Android Location Services, Django REST APIs, PostgreSQL, and real-time dashboard polling.
- Architected and optimized infrastructure for 3,000–4,000 concurrent users through database indexing, telemetry optimization, connection pooling, and Unicorn/Nginx tuning.
- Deployed the platform using AWS EC2, Docker, Nginx, Unicorn, PostgreSQL, and S3, implementing secure telemetry ingestion, audit trails, assignment lifecycle controls, and remote session termination.

AI/ML and Full Stack Intern | Telangana Police IT Cell

Hyderabad | 2026

- Architected an on-premises Retrieval-Augmented Generation system for internal government use, covering LLM selection, infrastructure sizing, and deployment planning.
- Supported Llama 3.1 8B and Llama 3.3 70B with AWQ INT4 quantization through vLLM across 6 NVIDIA A100 80GB GPUs.
- Implemented multilingual retrieval across English, Telugu, and Hindi using BGE-M3 embeddings and Qdrant.
- Automated bulk processing and AI enrichment of information memo PDFs using the Anthropic API.
- Prepared a 5-year Total Cost of Ownership analysis comparing on-premises infrastructure with public and private cloud alternatives.

Python Developer Intern | Meta SciFor Technologies

Remote | Feb 2025 – Sep 2025

- Engineered 20+ secure REST APIs with OAuth2 authentication using Django and Flask.
- Improved database query performance and storage efficiency by 40% through database optimization.
- Automated 7+ workflows using webhooks and third-party integrations, reducing repetitive manual processing.
- Collaborated across 3 cross-functional teams to deliver backend systems and maintain CI/CD pipelines.

Google Campus Ambassador | Google

CMR Technical Campus, Hyderabad | Jul 2025 – Dec 2025

- Engaged 1,000+ students through technical sessions, workshops, hackathons, and developer programs.
- Organized 10+ technical events including study jams, workshops, and coding competitions.

PROJECTS

ResQMesh AI | Offline-First AI and Tactical Mesh Platform

- Built an offline-first platform using Python, FastAPI, SQLite, React, and Electron, combining AI-assisted incident analysis with local data processing.
- Implemented an on-device RAG engine for emergency SOP retrieval and AI-assisted incident correlation.
- Developed peer-to-peer mesh networking with UDP and mDNS discovery, multi-hop routing, packet caching, and link-quality metrics.

NestIQ | Intelligent Real Estate Forecasting

- Built an AI-powered property valuation platform using Random Forest Regression, Pandas, Scikit-learn, and geospatial analytics across 7 global regions.
- Developed Django REST APIs and integrated OSMnx, Shapely, and Geopy for location-based data processing and feature engineering.
- Deployed the application on AWS EC2 using Unicorn and Nginx.

V-CONF | Real-Time Video Conferencing Platform

- Developed a real-time video conferencing platform using Django, WebRTC, and ZEGOCLOUD SDK with authentication, dynamic room management, video communication, and screen sharing.

EDUCATION

Bachelor of Technology, Computer Science and Information Technology

CMR Technical Campus, Hyderabad | Expected Graduation: 2027

TECHNICAL SKILLS

Programming: Python, SQL, JSON, Kotlin

Software Development: Django, Django REST Framework, Flask, FastAPI, REST APIs, WebRTC, OAuth2, Webhooks, API Integration

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Qdrant

Cloud and DevOps: AWS EC2, S3, IAM, Docker, Git, GitHub, Linux, Nginx, Unicorn, CI/CD

AI and ML: Machine Learning, Deep Learning, NLP, LLMs, Generative AI, RAG, Computer Vision, OpenCV

AI Infrastructure: Llama 3.1, Llama 3.3, BGE-M3 Embeddings, vLLM, Anthropic API

Engineering: Testing, Debugging, Database Optimization, System Integration, Automation, Legacy System Modernization

CERTIFICATIONS

AWS Academy Cloud Architecting, AWS Academy Cloud Foundations, ServiceNow CSA, ServiceNow CAD, DLT and Hedera Network Certification, Generative AI Tools Certification, Scrum Bootcamp Certification

ACHIEVEMENTS AND LEADERSHIP

National Hackathon Finalist, 2-time participant | McKinsey Forward Program Graduate | Google Campus Ambassador | Treasurer and Core Committee Member, Lexis Club | Organized 10+ college-wide technical and cultural events
